Arizona Corporation Commission
Docket E-00000C-11-0328 (smart meter)

Dear Commissioners,

My name is Scott Killingsworth and I am writing to ask you to please require APS to refrain from installing any type of transmitting smart meters in the town of Snowflake, AZ. I am a resident of northern Arizona who is planning to buy land and build in Snowflake within the next year, but due to my electromagnetic sensitivities (EHS) I cannot move forward with my plans until I am confident that I will not at some point be sickened by a smart meter installed on my property.

As you may be aware, Snowflake has become a haven for many individuals suffering from chemical and electromagnetic sensitivities (collectively known as Environmental Illness, or EI). This is due to its outstanding air quality and low electromagnetic fields. EI is an extraordinarily challenging condition whose only guaranteed treatment is avoidance of the chemicals and electromagnetic fields that elicit symptoms. Symptoms vary somewhat from person to person, but often include debilitating headaches, dizziness, balance problems, sensory disturbances, and muscle and joint pain.

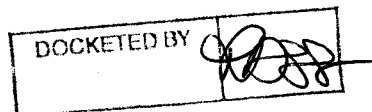

So again I urge you to take action to ensure that APS does not ever install any form of smart meters in Snowflake. It is critical for current and future residents that Snowflake continue to serve as a safe haven from this type of electro-pollution that would undoubtedly harm us. And I trust—given Snowflake's low population density—that prohibiting smart meters there will not harm APS's corporate profits in any measurable way.

Thanks very much for your consideration of this important matter.

Regards,
Scott Killingsworth
